

SRIRAM SABAVATH

AI Engineer | LLM & RAG Systems | Machine Learning

Hyderabad, Telangana — +91 6304410242 — sabavathsreeram242@gmail.com — linkedin.com/in/sriram-sabavath — github.com/sabavathsriram

SUMMARY

Results-driven **AI Engineer** with hands-on experience building **LLM-powered applications**, **RAG pipelines**, and **deep learning models**. Delivered production AI systems including an OCR + LLM carbon intelligence platform and a CNN model with **90%+ accuracy**. Interned at **Bluestock Fintech** on real-world data pipelines. Finalist in two national hackathons; **500+ LeetCode problems** solved (Top 25% globally).

SKILLS

AI / ML: LLMs, RAG, LangChain, Prompt Engineering, Fine-Tuning, CNN, ANN, Model Evaluation

ML Frameworks & Libraries: TensorFlow, Keras, NumPy, Pandas, Scikit-learn, ChromaDB

Development: Python, JavaScript, Java, React.js, Node.js, Express.js, FastAPI, RESTful APIs, Microservices

Databases: Vector DBs (ChromaDB), MongoDB, SQL

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, Git, GitHub, Linux, Postman

EXPERIENCE

Bluestock Fintech

Hyderabad, India

Software Developer Intern

Jun 2025 – Jul 2025

- Built backend features for a **stock trading platform** using **Python, Django, and SQL**, handling market data processing pipelines and database operations.
- Applied **clean-code and SDLC** practices in a cross-functional team environment, gaining production-grade experience directly transferable to **AI system deployment**.

PROJECT EXPERIENCE

Carbon Intelligence Platform (Python, FastAPI, LLMs, OCR, RAG, LangChain, ChromaDB) github.com/sabavathsriram/carbonEm

- Architected an **end-to-end AI platform** for enterprise carbon accounting, integrating **LLMs and OCR** to automate invoice-to-data extraction and deliver intelligent sustainability recommendations.
- Designed a **multi-stage RAG pipeline** using **LangChain and ChromaDB** for semantic retrieval over emissions documents, reducing manual data entry and improving extraction accuracy.
- Owned solution **end-to-end from architecture to deployment** — Scope 1, 2 & 3 tracking, analytics dashboards, and compliance-ready reporting via FastAPI.

Plant Disease Detection System (CNN, TensorFlow/Keras, FastAPI, Python) github.com/Glitchinh/plant-disease-detection

- Designed, trained, and deployed a **CNN-based deep learning model achieving 90%+ accuracy** for real-time plant disease diagnosis via a **FastAPI** inference server.
- Built **data preprocessing pipelines** (normalization, augmentation, class balancing) to resolve overfitting and optimize model generalisation on a multi-class task.

Dolphin Marketplace Platform (React.js, Node.js, Express.js, MongoDB, JWT) github.com/sabavathsriram/dolphin

- Built **10+ scalable RESTful APIs** with microservices architecture and JWT authentication, demonstrating robust back-end engineering skills foundational to **AI application infrastructure**.

EDUCATION

Keshav Memorial Institute of Technology (KMIT)

Hyderabad, India

B.Tech in Computer Science and Engineering

2023 – 2027 CGPA: **8.9 / 10.0**

Pragathi Junior College

Hyderabad, India

Class XII – TSBIE

2021 – 2023 Score: **97.6%**

ACHIEVEMENTS

- Cognizant Hackathon Finalist** — shortlisted among **96 finalists** from **22,000+ students** nationwide for an AI-powered enterprise solution.
- LeetCode:** Solved **500+ DSA problems**, rating **1500+** (Top 25% globally); focused on dynamic programming, graphs, and algorithmic optimization.
- CBIT Hackathon Finalist** — recognized among top teams for an AI-based real-world application.
