

SRIRAM SABAVATH

Full Stack AI Engineer — LLMs, RAG Pipelines, LangChain, FastAPI, React.js, REST APIs
Hyderabad, Telangana, India — +91 6304410242 — sabavathsreeram242@gmail.com
LinkedIn — GitHub — LeetCode

PROFESSIONAL SUMMARY

Computer Science undergraduate (2027) with hands-on experience building **AI-native full stack applications** using **Python, FastAPI, React.js, LLMs, RAG pipelines and LangChain**. Delivered production-ready systems with **agentic workflows, ChromaDB vector search, OCR integration and LLM-orchestrated backends**. Software Developer Intern at **Bluestock Fintech**; **500+ DSA problems** solved; finalist in national-level hackathons with **22,000+ participants**.

TECHNICAL SKILLS

Languages & Frameworks: Python, JavaScript, Java, SQL, React.js, Node.js, Express.js, FastAPI, REST APIs

AI & LLM: LLMs, LangChain, RAG Pipelines, Prompt Engineering, ChromaDB, OCR Integration, CNN Models

Cloud & DevOps: AWS (EC2, S3), Docker, Git, GitHub, CI/CD, Linux, Postman

Core CS: DSA, OOP, DBMS, Operating Systems, Computer Networks, SDLC, Agile Development

EXPERIENCE

Bluestock Fintech

Hyderabad, India

Software Developer Intern

Jun 2025 – Jul 2025

- Built and optimised **REST APIs** for a stock trading platform using **Python, Django and SQL**, supporting real-time market data workflows and portfolio tracking features.
- Participated in **agile sprint cycles**; improved backend reliability through rigorous **API testing, debugging, input validation and clean coding practices**.

PROJECTS

Carbon Intelligence Platform (Python, FastAPI, LLMs, OCR, ChromaDB)

GitHub

- Built an **AI-powered carbon accounting platform** for automated invoice processing using **OCR and LLMs**, enabling intelligent extraction and analysis of carbon-related data from enterprise documents.
- Developed **FastAPI backend APIs**, structured data workflows, and low-latency processing pipelines; leveraged **ChromaDB** for efficient storage and retrieval of processed document insights to support analytics and reporting.

DolphinOrg – Startup Ecosystem Platform (Node.js, Express.js, MongoDB, REST APIs, Authentication)

Live Project

- Contributed to the development of a **startup ecosystem platform** enabling entrepreneurs to validate ideas, connect with mentors and investors, and participate in startup growth programs.
- Built and integrated **REST APIs, authentication workflows and backend modules** using **Node.js and Express.js**; supported secure user onboarding and platform interactions.
- Designed responsive UI workflows and optimised **database-driven operations** for startup profiles, founder engagement and entrepreneurial networking features.

Plant Disease Detection System (CNN, FastAPI, Node.js)

GitHub

- Built a **CNN-powered inference system** achieving **90% model accuracy**; deployed real-time prediction APIs using **FastAPI** with integrated frontend services for end-to-end usability.
- Optimised **AI inference latency and cost** by streamlining model serving and backend data-flow architecture.

EDUCATION

Keshav Memorial Institute of Technology (KMIT)

Hyderabad, India

B.Tech in Computer Science and Engineering

2023 – 2027

CGPA: **8.9 / 10**

Pragathi Junior College

Hyderabad, India

Class XII (TSBIE)

2021 – 2023

Score: **97.6%**

ACHIEVEMENTS

- Cognizant Hackathon Finalist** — shortlisted among **96 finalists from 22,000+ participants nationwide** for building an AI-powered enterprise solution; presented live demo to stakeholders.
- LeetCode** — Solved **500+ DSA problems** with **1500+ rating**; proficient in trees, graphs, DP and optimisation.
- CBIT Hackathon Finalist** — recognised among top teams for delivering an AI-based real-world solution under time constraints.
